## **Dioptics Introduces “Panorama” to the Haven Fits Over Sunwear™ Collection**

**San Luis Obispo, CA (February 24, 2010):** Dioptics Medical Products, the world leader in Fits Over™ sunglasses and solutions, is proud to introduce the newest segment in the Haven Fits Over Sunwear™ collection. The Panorama Fits Over designs are innovative and fashion forward, attracting all ages of prescription eyeglass wearers while maintaining the necessary protection expected from a Fits Over product.

Panorama styles maintain the full coverage features of standard Fits Over sunglasses, with less bulk and a more streamlined design to appear as a standard sunglass. Patented Panorama designs feature wraparound lenses allowing maximum peripheral view while still providing Advanced UV Protection™ by blocking 100% UVA/UVB light from all angles. Similar to the other Haven categories, Panorama includes cleanly integrated BendToFit™ temples providing the ultimate in customized fit and comfort.

The Haven collection delivers as the leader in superior optical performance in a Fits Over Sunglass. TX7 Lenses starts with a foundation of an optical-grade, polarized lightweight lens that blocks the harshest and most damaging reflective rays. Standard lens surfaces at microscopic level are irregular and full of pits that trap grease and grime. ZFS (Zero Friction Surface) technology provides the adhesion of multiple lens coatings to fill and seal those gaps. This results in a perfectly smooth surface providing the highest grade of water repellence and advanced oleo phobic properties to prevent build-up of dirt and grime. Tough Coat lenses protect the surface to maintain those properties and provide five times more scratch resistance than ordinary lenses lasts the life of the product.

Dioptics Medical Products has manufactured the leading brands provided by doctors to their patients since 1979. Dioptics’ extensive portfolio of branded products focuses on giving its customers unparalleled comfort and Advanced UV Protection™ from the sun.
