LIGHTGUARD POST-OPERATIVE PROTECTIVE EYEWEAR

San Luis Obispo, CA - Eyecare Professionals have expressed an overwhelming need for high quality, price conscious post-operative eyewear in response to self-regulatory changes in the pharmaceutical market place. In keeping with the tradition as the world's leading manufacturer of OverRx (over prescription) and specialty eyewear, Live Eyewear is proud to introduce LightGuard™ as the solution to their demands.

LightGuard offers superior scratch resistance, anti-fog and UV400 protection, making it the highest quality post-operative eyewear on the market at a price that is lower than all other competitive options. LightGuard offers optical quality, post-operative protection and meets the eyewear standards of ANSI Z87.1-2003, EN 166 and AS/NZS 1337.

LightGuard is designed to deliver maximum protection from UV, reduce glare and minimize direct air flow that can irritate sensitive eyes following surgery. The new collection is available in both a wear-alone sport wrap style designed to meet the needs of post-Lasik surgery patients and multiple OverRx (over prescription) options to meet the unique post-op needs of those that require corrective eyewear. LightGuard are available in a general purpose smoke tint that provides excellent glare reduction and minimizes light intensity.
