

FOR IMMEDIATE RELEASE:

March 1, 2010

#### Alpha 9: Super-Stylish Acetate Frames

A set of new products consistent with the LIGHTEC range: fitted with the exclusive screwless "alpha" flex hinge system. Lightec now has 6 new styles with acetate fronts and stainless steel temples (2 men's styles, 2 women's styles and 2 unisex styles).

The front is made from crystal-based colored acetate, allowing the perfect marriage of lines and materials: tortoiseshell on a red or beige base. This collection combines Panto shapes, and blacks on a sanded crystal base in highly fashionable large rectangular frames. The whole range provides the wearer with a light, reliable and comfortable product.

Lightec: a collection where innovation is everywhere.
